

CALL FOR VISITING STUDENTS

When:

12-month stay beginning
January 1st, 2023

Where:

Colorado School of Mines
(Golden, Colorado)

Funding:

Graduate student salary
(\$32K), travel, health
insurance

Topic: Experimental material science: thermoelectrics and batteries

Description: Student's activities will focus primarily on synthesis, structural investigation and high temperature transport measurements. The funding project involves collaboration with teams from other US universities, including Harvard and Princeton, in computational materials and computer science. Successful visiting students will be invited to continue research as PhD candidates in our group.
